

Project Name: Burlingham Bridge, CR 61

Project Type: Construction Inspection

Location: Town of Mamakating
Sullivan County, New York

Construction

Cost: \$.525 Million

Completion

Date: 2006

Project Highlights

- Full-time construction inspection
- Staged construction with temporary bridge
- Natural stream channel restoration

Project Description:

This Sullivan County-sponsored and CHIPS funded project provided for the replacement of County Bridge 152 under Phased Construction. Major items of work included temporary traffic signal installation, temporary bridge and detour construction, temporary coffer dam, demolition of superstructure and substructure, cast in place footings and wing walls, and 3-sided High Span installation.

Creighton Manning Engineering provided the Resident Engineering to ensure conformance with the provisions of the Contract Documents and NYSDOT Standard Specifications. Construction Inspection Services included detailed inspection, field measurements, computations / reports, Progress and Final Estimates, and Shop Drawing Review and Approval.

CME Role:

Creighton Manning Engineering was retained by Sullivan County Department of Public Works to provide full-time Construction Inspection and Administration support for this bridge reconstruction project in the town of Mamakating.
