

Project Name: Luther Forest Technology Campus Interior Roads

Project Type: Highway Construction Inspection

Location: Towns of Malta and Stillwater
Saratoga County, New York

Construction

Cost: \$33,000,000

Completion

Date: Construction 2008-2009

Project Highlights

- Over five miles of new roadway construction through an undeveloped area.
- Over one million cubic yards of earth work.
- Extensive coordination with environmental agencies to avoid and minimize impacts to wetland areas and archaeological sites.

Project Description:

The objective of this project was to construct all the new town roads that would provide access to the future high-tech land uses in Luther Forest Technology Campus. The two primary access roads, the Stonebreak Road Access and the Main Access, were both constructed to NYSDOT arterial standards. The Stonebreak Road Access enters the campus from US Route 9 and is a two lane roadway with additional lanes at major intersections. The Main Access enters the campus from NY Route 67 and is a four lane roadway with additional lanes at major intersections. The project includes 4 three sided culverts, extensive earthwork related to the terrain, wetland mitigation, a complex storm water system, 30" water line, 3 roundabouts, lighting, high voltage electric duct bank, a multi-use path and ongoing coordination with property owners and utility companies.

CME Role:

Creighton Manning Engineering was responsible for the construction inspection and administration of the construction contract for the roads and bridges. CME represented the Town of Malta during the construction of this \$33 million State-funded project (NYSDOT PIN 1757.08.321). CME provided the Resident Engineer, Office Engineer and up to 8 Inspectors to administer this project in accordance with the requirements of NYSDOT standards. Additional services provided by CME include:

- GPS data collection
- Precast plant inspection
- Utility & stake holder coordination
- Public information website creation & maintenance
- Field Manager estimating software implementation
- Inspected & maintained extensive erosion control systems

Client: Town of Malta
2540 Route 9
Malta, NY 12020
